Hello, my name is **Brian Trappett**. I have a background in electronics and computing and I have been working with **Peter Ralley**; a digital media producer with a passion for local heritage; to create a project to engage, educate and excite visitors to Churches like yours, Churches that distinctively contain a rich combination of visual and interpretive heritage.

Our technology educates your visitors all about your Church building, its rich history and can enable them to experience things they may never normally see such as the church bells in action, the church organ being played, important services such as baptisms as well as artefacts and historical points of interest.

We make short heritage films, audio commentaries, photograph slideshows and self-guided tours. We then put these together onto a Visitor Information Service BOX (**VIS-BOX**).

WHAT IS VIS-BOX?

VIS-BOX plugs into a power socket and is hidden away. From here it creates a secure and private network that your community and visitors can easily **access on their mobile phones and tablets** to learn all about the rich heritage of your building as well as learn about the services, events, news and the help that you can provide.

VIS-BOX is **safe and secure** because there is **no internet or phone connection** so your visitors only see what you want them to see and they can even leave feedback and messages for you.

WHERE IS VIS-BOX CURRENTLY IN SERVICE?

VIS-BOX has been continuously engaging visitors at different sites including:

Polesworth Abbey in Warwickshire

St. Helen's Church, Ashby de la Zouch

St. James' Church, Barton under Needwood (in progress)

VIS-BOX is a lot easier to demonstrate than it is to explain in writing, so I would be more than happy to **arrange a short meeting with absolutely no obligation** at your convenience to show you exactly what **VIS-BOX** can offer and more importantly how you can provide your visitors and community with this great service at **no cost to you** through the **HLF** (Heritage Lottery Fund) grant.

Contact me, Brian Trappett on **07988 770 366** (this is my mobile number as I am often out of the office) or email me at info@vis-box.co.uk for any questions that you may have.

You can visit my website at www.vis-box.co.uk for more information.

Thank you very much for taking your time to read this. Brian.
